

# Innovation Bulletin

Yamada is pleased to introduce the polypropylene center section for the NDP-50. Through research and development, this center assembly is truly a cut above the competition. Configured for the current NDP platform, you still get the same reliability of a tried and true design. However, the new center section includes:

## Volumetric Efficiency

- Lower air consumption

## Modular Pilot Valve (Stroke Length)

- Optional pump performance

## Graphite Filled Seal Rings

- Longer life, better wear

## Integrated Air Motor

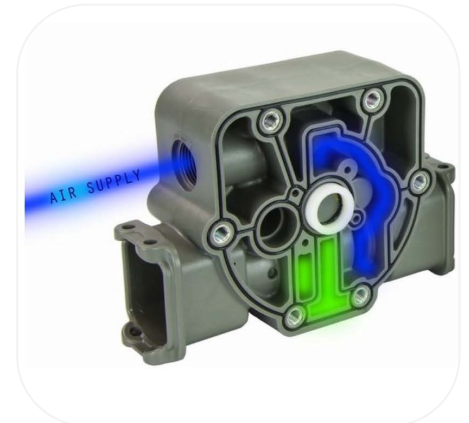

- Fewer parts, more efficient

## Corrosion Resistant

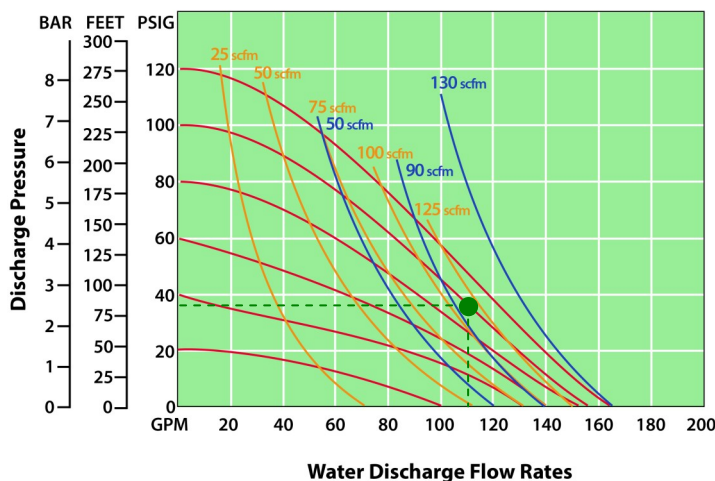

- Great for corrosive atmospheres

## Shock Absorbing Base

- Protects pump from piping system shock

YAMADA ■ vs. LEADING BRAND ■
